

Midwest provides you with a wide selection of letters and accessories from Wagner Zip-Change. A leader in changeable copy letters since 1928, Wagner continues to offer Zip-Change flat letters, slotted dimensional letters and Zip-Lite reverse copy letters, along with a large selection of sign accessories.

## LETTERS

### Zip-Change® Letters & Numbers

These formed letters are made of durable acrylic and clear coated for scratch resistance. Letters slide together for perfect spacing every time. Letter sizes (in inches): 4, 6, 8, 10, 12, 15, 17 and 24.

**Solid Stroke:** Blue, Green, Brown and White letters are also available in 4", 6" and 8" sizes.

**Half-tone:** Three-dimensional letters are available in Black and Red in all sizes. Blue and Green are available in 4", 6" and 8" sizes.

**Solid Condensed:** Condensed solid letters are available in Black and Red in 4", 6" and 8" sizes.

**Modern:** Available in Black and Red in 1 1/2" through 12" sizes.

**Modern Econo:** Available in Black and Red in 6" letters on 7" panels and 8" letters on 9" panels.

**Modern Mini Marquee:** These Black 1 1/2" letters are approximately 1 1/2" to 2" wide, so close to 7 letters will fit per foot of copy. Special Mini-Marquee "H" track must be used with letters. Available in 8' lengths only.

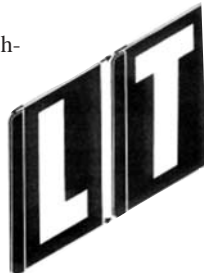

### Wagner Dimensional Letters & Numbers

Wagner's dimensional letters are sturdy and more readable than other letters on the market because of their deep return, wide stroke and matte finish. Manufactured from outdoor-grade, high-impact plastic, they are just about impossible to break and are GUARANTEED for 3 years. Available in Red and Black in 4", 6", 8", 10" and 17" sizes.

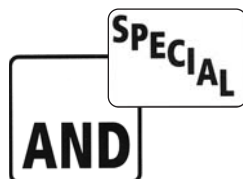

### Zip-Lite® Reverse Copy Letters

**Durable** — Zip-Lite letters are printed on a high-impact DR® material and sealed with a clear protective coating to resist scratching and fading. You get a unique appearance while eliminating the risk of light leaks around the letters. When used with the recommended blank spacers, the final result is a totally opaque sign face with reverse copy. Available in Black in 4", 6", 8", 10" and 12" sizes.

### Zip-Change® Word Plates

Word plates are used to conserve copy space and installation time. Available in solid Black or Red in 6", 8" and 10".

## ACCESSORIES

### Mechanical Letter Changer

You get easy handling of each letter from the ground up to 18 feet with this lightweight, simple-to-operate tool. Available in six lengths, 6', 8', 10', 12', 14' and 16' with single or double suction cups.

### Zip-Change® Letter Changer

The Zip-Change® Letter Changer permits easy handling of each letter from the ground. Its heavy-duty suction cup(s) firmly hold each letter for positive control and can easily be set to any angle. Available in 12', 18' and 24' lengths with single or double suction cups.

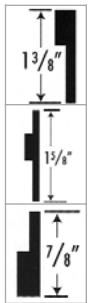

### Zip-Change® Track

Zip-Change® Lettering Track is available in high-impact acrylic for plastic backgrounds or aluminum for non-plastic backgrounds. Choose from three solid profiles to meet your specific requirement: top, mutual and bottom (shown respectively at right).

**Plastic Track:** Available in 6', 8', 10' and 12' sections.

**Aluminum Track:** Available in 8', 10' and 12' sections.

**NOTE:** Aluminum track is only available in mutual style.

### Wagner Plasti-Bar & Alumabar Track

**Plasti-Bar:** A clear, extruded, high-impact acrylic track used to mount Wagner slotted changeable letters. Ideally this track should be cemented only to acrylic (plastic) backgrounds. Available in 6', 8', 10' and 12' lengths.

**Alumabar:** An anodized aluminum track similar in shape to Plasti-Bar and designed for quick and inexpensive applications. Not recommended for use on acrylic (plastic) background. Available in 8' and 10' lengths.

### Zip-Change® Storage Cabinets

Portable letter storage cabinets are available for every size letter. Each letter has an individual compartment for easy selection and sorting. Lightweight, medium-density fiberboard cabinet has a capacity of a 300-size font.

#### Cabinet Dimensions:

For 4" or 6" letters: 24" x 16" x 8"

For 8" letters: 24" x 22" x 9"

For 10" letters: 24" x 26 1/2" x 8 7/8"

For 12" letters: 24" x 30 1/4" x 10 3/8"

Wagner also offers a full line of plastic form letters in a variety of colors, fonts and sizes. Contact your Midwest rep for complete details.

## Standard & Custom Formed Letters

Wagner Zip-Change, Inc. Formed Plastic Letters are manufactured from co-extruded Plexiglas DR® which has 10 times greater impact strength than conventional acrylic. This material is easy to solvent weld, has excellent color stability and incomparable weather-ability under the most severe outdoor exposures. *Choose from a variety of standard letter styles and colors or have custom molds made for your specific application. Contact Midwest for more details.*

## Gemini Incorporated

**Letter Mounting Studs:** These continuously threaded aluminum rods are to be used with acrylic mounting blocks and acrylic mounting pads. *Available in various lengths a form 1" to 6" and two thread styles: 20 and 24.*

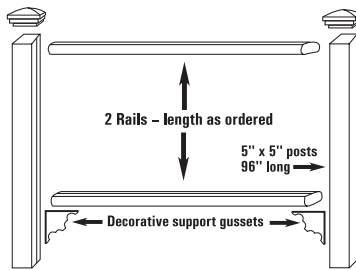

## Graphic Bar Directories & Post & Panel Systems

Designed for use in areas where changes of information are anticipated. Ideal for corporate parks, office complexes and more. *Contact Midwest for more information and a complete catalog.*

## Post & Panel Kit

This extruded PVC kit is strong, lightweight, easy to assemble and maintenance-free. It will not warp or twist and is tested to withstand 100+ mph winds. You can customize it to any size sign panel up to 4' x 8'. Designed exclusively for the sign industry, it's ideal for use with Omega SignBoard®, Alupalite®, D-Lite™, Lusterboard® and Econolite™ panels, as well as with 1/2" MDO and Wood Substrate Panels.

## Post & Panel System

SignComp™ makes it easy for you to offer your customers a high-quality, truly architectural post and panel system that is ready to ship when you are ready to order. Constructed of extruded aluminum, all components are powder-coated gloss white for long-lasting exterior durability and require no painting. Available in 3 1/4" round or square posts and in 96" or 144" lengths. All posts are pre-slotted 48" to accommodate any 1/2" panel material up to 48" in height. *Contact Midwest for complete information on these kits.*

## LetterLok 3000 Return Fastener

This air over oil powered clinching machine features a one-piece steel frame with a 3 1/2" throat. The LetterLok 3000 eliminates drilling and pop riveting open letter returns and letter centers. It produces UL approved fasteners from two pieces of metal. Average die life is approximately 350,000 hits. *Machine capacity is a combined thickness of 0.160" in aluminum.* **Contact Midwest for more information.**

## LetterLok 4000 Fastening Machine

The LetterLok 4000 is a 25" throat machine designed for clinching channel letters. With its versatile design and unsurpassed features, it will reduce your channel letter fastening costs and outperform the competition. Eliminates drilling, welds, rivets and staples while producing UL recognized fasteners. *Clinches letters 2" to 10" deep with combined thickness of up to 0.160" in aluminum.* *Table is 30" x 60". Cycle times of 60-80 cycles per minute.* **Contact Midwest for more information.**

## Channel Letter Coil

With our channel letter coil, there's no shearing or slitting required. Perfect for all your channel letter applications. *Sizes include 5.3" x 270' and 8.5" x 270'. Available in .032 thickness in white/white or bronze/white. Also available in .040 thicknesses in white/white, bronze/white, black/white, red/white and blue/white. Contact Midwest for custom sizes and colors.*

	Black/White		Red/White
	Blue/White		White/White
	Bronze/White		Yellow/White
