

Bantex® Banner media by Herculite® offers you the highest quality scrim-vinyl material available, ensuring consistent prints every time. They are formulated to minimize and control dot gain, giving you clean, clear prints even on your most demanding jobs. You'll find Bantex media is ideal for printing on the Mimaki, HP, Roland and other solvent-based or UV-curable ink jet printers. Bantex is available in 50-yard rolls with widths of 37.5" up to 74.5", enabling you to print finished banners from 3' to 6' wide. Or, on wider-format machines, you're able to print two finished 3-foot-wide banners at one time, which saves on your material costs and improves your production time.

Bantex 10-ounce Single Sided

Premium banner material for process and digital printing.

Designed for the most demanding printing work – screen or digital, this media has a superior surface to provide a high level of control for dot gain and color uniformity. Its engineered stiffness and lay-flat ability is ideal for going through digital printers. Reinforced for high performance, it is perfect for high production of indoor and outdoor graphics.

Bantex 13-ounce Blackout Curl Free

Banner material specifically designed for curl-free applications.

This material is perfect for retractable and standard banner stands and other applications where edge curl is not desired. Curl Free is a flame-retardant, laminated banner material that has a micro-textured surfaces for low dot gain and higher resolution printing on both sides of the material. You'll get great quality prints and predictable color that will more than meet the demands of today's graphics market.

Bantex 13-ounce Blackout

Micro-textured, super-smooth, versatile banner material.

Choose this media when you are looking for an economical two-sided, heavy-duty banner material. Since Blackout features a smooth print surface on both sides, you get consistent printability with predictable color clarity and accuracy for great-looking prints every time! It's the perfect choice for indoor and outdoor applications.

Bantex-Terra™ Banner Media

Bantex-Terra™ has the same great characteristics as Bantex 13-ounce Blackout, but includes eco-friendly properties. Bantex-Terra is landfill-compostable in 1-5 years and can be recycled when properly processed.

Bantex 10-ounce Wallcover

Super-smooth wall-covering banner material for solvent and UV printing.

No special prep time is necessary when you use this printable wallcover media. It applies easily with standard wallpaper-hanging procedures. With its super-smooth printing surface, it is ideal for solvent and UV-curable digital inks, offering near-photo-quality printing and excellent durability.

Bantex Media

	Width	Flame Resistance	Tensile Strength (lbs./in.)	Tear Strength (lbs.)	Hydrostatic (PSI)	Indoor	Outdoor
