

Mimaki JF Series UV Flatbed Printers

When you need vivid color and flexibility in printing on rigid media, you can count on the Mimaki JF Series printers to deliver in the crunch! The JF Series UV flatbeds can quickly and easily handle a variety of media thicknesses and surfaces, and produce brilliant, lasting color that is bound to turn heads.

The "WOW!" Factor

Your signs and POP graphics will have an extra zing of brightness when printed on the Mimaki JF Series printers.

These printers use six colors plus white—which provides an excellent base on any colored surface—and a clear coat for a glossy finish that brightens and protects colors! Your customers will be impressed with the finished product.

More Options...and More Business!

When you choose a Mimaki JF Series flatbed printer, you also choose expanded capabilities for your shop! The rigid media options are endless with the Mimaki JF Series printers. The JF Series is designed to accommodate a variety of uncoated substrates, such as corrugated plastic, PVC, acrylic, and uneven or irregular materials.

Plus, the JF Series lets you choose high resolution printing of up to 1440 x 1200 dpi or a fast print speed of up to 140 sq. ft./hr. Whether your customers need high quality or fast prints, the JF Series printers will help your shop deliver results that keep customers coming back with new projects.

Great Features that Save You Time and Money!

Besides superior versatility, print speed and output resolution, Mimaki JF Series flatbed printers have loads of features you're sure to appreciate during production. You'll get faster prints and use less material!

- Dual bi-directional UV lamps that increase production speed
- Quick, precise setup for printing on multiple pre-cut pieces at one time
- Electronically-controlled Y-Bar Height adjust mechanism for easy raising and lowering of print heads
- Sensor that detects media height and prevents print head strikes on warped or bent substrates
- Roll hanger for flexible or rolled substrates
- Environmentally-friendly UV curable ink
- Vacuum table holds media flat and stationary for accurate printing on even heavy or easily misaligned substrates, which can also be reversed to blow air under media for easy moving
