Check Out the New Features

- Clipping paths let you create new effects by masking pictures or other vectors with vector shapes.
- Embedded Images save time and effort by allowing images to be included with the OMEGA PLT file.
- Improved file import for PDF, AI, EPS and Postscript files saves redesign time.
- Dimensioning tools make it easier than ever to create customer layouts, proofs and installation drawings.
- Layers make it easier than ever to organize, design and output jobs.
- Additional bonus features include more standard fonts, the ability to pause the Gerber EDGE before rewinding vinyl, a new preflight output preview tool and more!
