Pre-stretched Aluminum Frames

Quick... Easy... Affordable!

If you're currently using wood or aluminum stretch and glue frames, then you'll want to check out our new textile, pre-stretched aluminum frames from Sefar. Available in several standard frame sizes and a variety of mesh counts, these frames are ideal for your textile jobs. Whether you print manual or automatic, Sefar frames are the perfect economical choice for your shop.

Every care is taken with these frames to assure accurate tension for your print job. The frames are sandblasted and then powder-coated for a smooth, durable finish. Stretched with Sefar mesh (choice of white or yellow mesh) in a number of counts ranging from 25 to 355, the frames provide uniform tension from 20 to 24 N/cm, screen to screen, batch to batch. Because you're assured uniform tension, you get improved color consistency and higher print speeds. The pre-stretched frames will also minimize your need to make off-contact adjustments to accommodate varying screen tensions, reducing your down time and increasing production.

You can count on superior image quality, uniform tension and excellent durability with these frames – which all add up to increased profits for you. Make Midwest your single source for all your pre-stretched aluminum frames!

Frame Features

- Smooth, durable finish
- Uniform screen tension
- Available in several standard sizes with mesh counts from 25 to 355

Frame Benefits

- Improve printing consistency
- Increase printing speeds
- Minimize off-contact adjustments
