

Sign•Foam® Strong Polyurethane Board

Sign•Foam3® is a high-density polyurethane board that is a great alternative to redwood and cedar. Lightweight, yet remarkably sturdy, it is completely waterproof, due to its unique, closed-cell structure—perfect for your outdoor applications. Plus, it is unaffected by temperature or moisture, and will not rot or decompose. Available in 10 lb, 15-lb and 18-lb densities in sheet sizes of 4' x 8', 4' x 10', 5' x 8' and 5' x 10', with thicknesses from ½" up to 12".

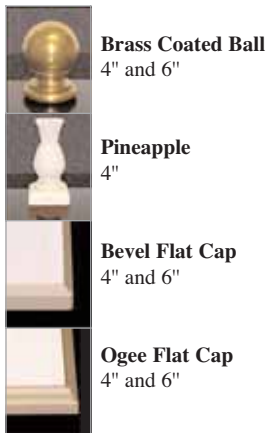

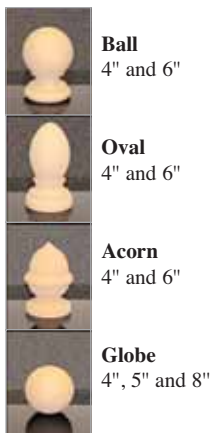

Sign•Prime™

Sign•Prime™ is a premium, all-purpose primer formulated specifically for painting on Sign•Foam3® in just one coat. It is fast drying and offers excellent adhesion for any surface coating including latex, enamel or two-part urethane paints.

Dura•Caps™ Decorative Post Top Finials and Caps

Dura•Caps™ from Grain Fram™ are your perfect choice for a long-lasting, decorative post top finial. They are completely waterproof and stand up to your most extreme outdoor temperatures—no cracking or decaying! Available in a number of styles and sizes to match any sign project. Standard sizes are made to fit 4" x 4" post.

Laminators Sign Panels

Lighter and stronger than MDO, these cost-effective, prefinished sign panels are ready to letter and can easily be cut to shape! You can fabricate these panels with wood-cutting tools, then paint with most standard sign paints and lettering products or apply vinyl graphics. Available in 4' x 8' and 4' x 10' panels.

Omega SignBoard®

SignBoard is available in ½" white with vinyl on one side or two sides, and exterior durability of more than five years. Ideal for pressure-sensitive vinyl applications, it can be used for your temporary signage, such as real estate signs and billboards.

LusterBoard®

LusterBoard® is colorfast, impact-resistant and has a smooth, glossy, aluminum surface. Prefinished on both sides, this board is available in a variety of colors and is perfect for your outdoor signage with exterior durability of more than 10 years. Available in ¼" and ½" thicknesses.

	White		Raven Black
	Sunset Red		Silver Metallic
	Brite Yellow		Matte Black
	Royal Blue		Ivory
	Candy Apple Red		Regal Bronze
	Ivy Green		Sand Beige

Colors are printed representations and may not match the actual product colors.

Medium Density Fiberboard

Medex is a powerful combination of moisture resistance, superior MDF board properties, and a formaldehyde-free resin system. Medex has a rock solid track record of superior design capabilities and environmental stewardship around the world. It's constructed of 100% recycled wood fiber and has no added formaldehyde, offering a truly "green" product. Both sides and all the edges are preprimed, making it the ultimate substrate for sandblasting, carving, laminating, gluing, painting and machining. Available in 4' x 8' and 4' x 10' panels in ⅜", ½" and ¾" thicknesses.

Medium Density Overlaid (MDO) Plywood

A combination of strong plywood with tough overlays gives you superior surface performance that lasts longer than other sign materials, providing consistent quality and dependability. Available in 1- or 2-sided panels, in 4' x 8' and 4' x 10' with 1/8", 3/16" and 1/4" thicknesses.

Crezon® TwoStep® MDO Panels

Get a smooth finish that offers an ideal surface for vinyl lettering and graphics or paint. All edges are primed gray and top coated (also available unprimed) to avoid moisture penetration into the substrate. Can be purchased with a mill-applied prime coat, with the coat specified for one or both sides. Available in 1- or 2-sided panels, in 4' x 8' and 4' x 10' with 1/8", 3/16" and 1/4" thicknesses.

SignReady UV Panels

These prefinished, White 4' x 8' MDO panels are integrated with Olympic's DiamondGuard™ finish that's a urethane-acrylic-based, UV-cured coating system. You get a more durable, scratch- and mar-resistant finish than with any other MDO or vinyl overlaid panel on the market—with a 5-year limited warranty. Vinyl- and lettering paint-ready, it reduces your production time and is ideal for a variety of outdoor applications! Available in 1- or 2-sided White panels, in 4' x 8' x 1/2".

Cedar Sign Blanks

Midwest offers quality cedar sign blanks in many sizes to fit most of your wood signage needs. Allwood sign blanks are vertical-grain, edge-glued and made from western red cedar—a smart alternative to redwood. Whether you're sandblasting, carving or routing, these sign blanks are sanded on both sides and ready for your immediate use! All blanks are 1 1/4" thick and are available in a variety of sizes ranging from 12" x 17" to 48" x 119". Contact your Midwest rep for specific sizes.

X-Board

X-Board is a 100% recyclable multi-purpose composite board of densely structured paper honeycomb, sandwiched between two outer layers of laminate. It can be either screen printed or digitally printed on a flatbed printer. X-Board can be cut and shaped manually or digitally, is one-third lighter than conventional options, and suits an endless range of applications including POP, promotional displays and exhibition stands. Available in 48" x 96" panels (1/2" or 3/8" thicknesses).

Aluminum Composite Material

Dibond, made from two sheets of .012" aluminum with a thermoplastic core, is strong and lightweight, with an incredibly flat material. It's your ideal choice for a variety of applications because it's so easy to fabricate. You can bend, rout, fold, cut, paint or laminate it! And unlike some materials, this multipurpose substrate is resistant to breakage and can be exposed to any kind of weather. Contact your Midwest location for availability.

Gauge	Color(s)	Stock Sheet Sizes
2mm	White both sides	4' x 8', 4' x 10'
3mm	White both sides	4' x 8', 5' x 10'
4mm	White both sides	4' x 8'
3mm	Black over White	4' x 8'
3mm	Dk. Bronze over Fine Silver	4' x 10'

 Hunter Red	 Black	 Brushed Copper
 Ultra Marine Blue	 Fine Silver	 Brushed Bronze
 Caution Yellow	 Brushed Silver	 Brushed Stainless

Alumalite® Aluminum Composite Panels

Alumalite is a strong, aluminum composite panel with a high-density, corrugated polyallomer (CPA) core that will not swell, wick water, corrode, rot or delaminate, even under prolonged water exposure. Alumalite is ideal for paints, screen print inks, and pressure-sensitive vinyl, which bonds securely to it. It is perfect for outdoor applications, including: post and panel, hanging, wall/fence mount, multiple panel signs, P-O-P displays, cut-outs, channel letters, kiosk, laser printing, scoreboards and more. *Colors are available in 4' x 8' x 6mm panels. White, 2-sided is available in the following panels: 4' x 8' x 6mm, 4' x 8' x 10mm, 4' x 10' x 6mm, 5' x 8' x 6mm and 5' x 10' x 6mm.*

Econolite®

Cost-effective, lightweight and durable, Econolite is pre-finished white on one side and has an economical, unpainted backer on the other—perfect for your single-sided, supported post or panel and wall mount applications. *Available in 4' x 8' (6mm and 10mm) and 4' x 10' x 6mm.*

D-Lite®

An economical alternative to sheet metal or expanded PVC, D-Lite has a finished aluminum surface that won't crack, chip or peel. Applications include: wall mount, cut-out, kiosk, photo mounting, post and panel (supported), billboard fascia, channel letter backs, hanging signs, and P-O-P displays. *Available in 4' x 8' x 3mm with a single- or double-sided white painted aluminum face.*

Alumalite, Econolite and D-Lite are available in twelve colors:

	White		Raven Black
	Sunset Red		Silver Metallic
	Brite Yellow		Matte Black
	Royal Blue		Ivory
	Candy Apple Red		Regal Bronze
	Ivy Green		Sand Beige

Colors are printed representations and may not match the actual product colors.

Metal Sign Blanks

Aluminum Sheets

Painted aluminum sheets—for use indoors or outdoors—combine beautiful color with unmatched durability and remarkable economy. Use for sign blanks, P-O-P displays, license plates and electric sign cabinets. *Available in a variety of thicknesses, including .024, .032, .040, .063 and .080. Standard sheet sizes are 2' x 10', 3' x 8', 3' x 10', 4' x 8' and 4' x 10'. All sheets are white on one side.*

	Red		Heron Blue
	Construction Orange		Pepsi Blue
	Orange		Ivy Green
	Safety Yellow		Burgundy
	Yellow		Brown
	Nascar Purple		Ivory
	Chevron Blue		Black

Colors are printed representations and may not match the actual product colors.

Aluminum Sign Blanks

Prefinished aluminum blanks are white on both sides making them durable both indoors and outdoors. They are an excellent choice for screen printing and vinyl graphics. *Available in .024 and .040 thicknesses in sizes 18" x 24", 20" x 28" and 24" x 36". Or choose 12" x 18" white/white blanks with 3/4" radius corners in .040, .063 and .080 thicknesses. Call for custom sizes.*

Steel Sign Blanks

Our steel sign blanks are primed and double-coated white on both sides for a smooth, glossy finish that offers excellent screen printability. We recommend using enamel inks, but these durable blanks are also receptive to lacquers and UV inks. And they can be decorated using lettering enamels or a variety of pressure-sensitive films. *Available in 20, 24 and 30 gauge in sizes ranging from 18" x 24" to 24" x 48".*
