

## Direct-to-Garment Printer

**Lower ink costs.  
Less maintenance.  
Built for reliability.**

The latest generation of garment printers from Brother offer a fully integrated printing system with reduced maintenance. With Brother manufactured firmware, software and printheads give this series an edge over the competition who assemble their printers from parts from different manufacturers. The Brother advantage... built for reliability.

### Upgrade your printer as your business grows

GT-341 ●●●●

The unique, modular construction of the GT-3 Series allows you to expand at the rate of your business.

GT-361 ○○●●

- Just starting out? Start with **GT-341 with CMYK**. This model allows printing on whites and lights and is good for start-ups or to supplement an existing production facility.

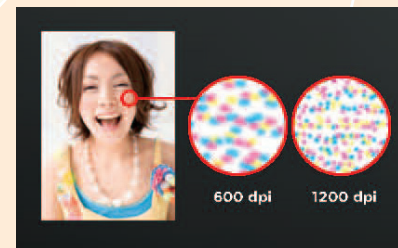

GT-381 ○○○○●●

- When you're ready to expand, step up to the **GT-361 with CMYK and 2 white print heads** and extend to printing on darks.

- Increasing production? **Expand to the GT-381 with CMYK and 4 white print heads**. Coupled with our one pass technology, you will be amazed how this model handles a large run.

### GT-3 Features

- Print up to 1200 dpi in fine print mode, perfect for photo printing, or select fast print mode (600 dpi) for logos and lettering.
- Newly formulated inks provide a wider color gamut for truer color matching.
- Print up to 16" x 18" on baby, youth or large shirts. Interchangeable platens\* allow for printing on caps, hoodies, coasters and other soft goods.
- One pass technology allows for printing white underbase and color simultaneously, increasing print speed and overall productivity. (Available on GT-381).
- No RIP required—the GT-3 series comes with its own printer driver.
- USB drive compatibility

\*Additional purchase required.

**Complete your new Brother GT-3 Setup with  
a Pre-Treat solution and Heat Press!** (See reverse side for options)

# Pre-Treat and Heat Press Options

Our recommended Pre-Treat and Heat Press options for the Brother GT-3 Series:

## Pre-Treat

### New DTG Pre-Treat™ Paper

Now you can pretreat garments without expensive pretreat machinery or messy spraying. DTG Pre-Treat™ Paper is infused with just the right amount of pretreat solution to help ensure the best possible results. Requiring only a minimal investment versus pretreat machines, DTG Pre-Treat™ Paper is cost-effective and ideal for short runs and startups. Available in 12" x 12" sheets in two saturations, one for light or bright colored garments and another for black or dark colored garments.

### ViperOne Tabletop Pre-Treat Machine

The compact ViperOne Pre-Treatment Machine, designed for small to mid-sized shipped, showrooms and mall kiosks keeps all spray and mist inside the unit and requires no electricity! This tabletop unit is lightweight and portable, and ready for use right out of the box.

### Viper XPT-6000 Pre-Treat Machine

The industry's first pre-treatment machine with a touch screen interface now provides even more control over the spray width, length and fluid laydown. The ViperXPT-6000 multi-nozzle system and smooth, accurate, consistent performance gives you the competitive edge in producing quality end garments with color fastness and durability. No air compressor is needed to get your ViperXPT-600 up and running... and start saving your shop time and money!

## Heat Press

### Insta Model 158 Digital Auto Release Heat Press

Insta's Model 158 Digital Auto Release heat press offers one of the major benefits of an automatic machine - the auto-open feature - in the lightweight, lower cost, ergonomic design of a manual clamshell heat press. The Model 158 meets the demands of today's busy retail environment and is also a practical solution to use as a post-curing agent for the expanding digital direct-to-garment marketplace.

### Hotronix Air Fusion 16" x 20" Model XF 120 Heat Press

The Hotronix Digital Auto Release heat press is the world's most advanced heat press. With four different pressure and time settings, hands-free auto-swing, and a touch screen controller, the XF 120 is the most versatile heat press for direct-to-garment curing. Requires 2.3 cfm of compressed air @120 psi for operation. **Air compressor not included.**
