

Hotmark Revolution

Join the Revolution with this versatile film featuring low temperature application, great stretch, and adhesion to most fabrics!

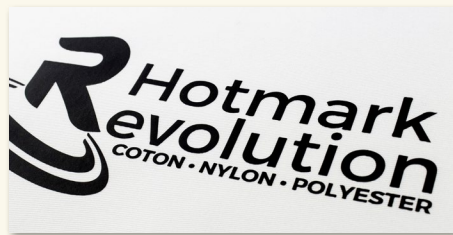

Chemica's Revolutionary versatile heat transfer film can be applied to a wide variety of garments and fabrics at a lower temperature than the standard Hotmark series of cuttable films. Allowing for either a hot-or-cold-peel, Hotmark Revolution is your go-to film to have at the ready for any job that walks through your door.

This 3mil film is incredibly stretchy and will conform to many textured fabrics, like ribbed cotton tank tops, and won't rip or split as it stretches.

Applications

- Cotton
- Polyester
- Nylon
- Cotton/Poly Blends

Ask your Midwest Representative today for more information on Hotmark Revolution!

Features
