

ENVIRONMENTALLY SAFE VINYL AND ADHESIVE REMOVER

CrystalTek™ Products are a line of environmental, non-toxic, biodegradable products that work. These products include a complete line for protecting and removing vinyl graphics, products for detailing all vehicles, and an exceptional adhesive remover.

**NON-TOXIC
BIODEGRADABLE
ENVIRONMENTALLY SAFE**

VINYL-OFF™

Environmentally Safe Vinyl and Adhesive Remover

Vinyl-Off™ is a safe and ready to use product designed to assist in removing vinyl graphics and its benefits are the most obvious on **older, more weathered vinyl graphics and decals**. Just wipe it on, wait a few minutes, and then peel off both the vinyl and the adhesive together. Removing decals and graphics with Vinyl-Off™ will save up to 90% less time and hours of labor.

REFLECTIVE VINYL-OFF™

More aggressive with faster penetrating action!

Reflective Vinyl-Off™ is an even more powerful solution for **removing specialty reflective products** and their thicker layer of adhesive backing.

It removes reflective vinyl, metalized vinyl, and even non-vinyl signage!

If you have an incredibly tough removal job, this is the product to use! Just apply generously, wait at least a few minutes and pull both vinyl and adhesive off together.

This is a powerful chemical and testing prior to use is highly recommended, especially on non-factory primed paints.

ENVIRONMENTALLY SAFE VINYL AND ADHESIVE REMOVER

ADHESIVE-OFF™

Quickly remove pressure sensitive adhesive, grease/asphalt/tar smears, paint overspray, printing inks, and even gum from multiple substrates.

Just thoroughly soak the dry adhesive with Adhesive-Off™, allow about 3-5 minutes of dwell time and, depending on the size of the removal area, either pressure wash, scrape, or wipe off easily.

Its non-flammable waterborne formula and mild vanilla scent are widely preferred over competing products, especially for indoor use. Contains no terpenes, caustics, acids, or known carcinogens.

GHOST-OFF™

Restores weathered surfaces and easily reduces ghost sign images.

Ghost-Off™ restores weather exposed surfaces

and easily reduces ghost sign images from vehicle surfaces. Ghost-Off™ is a ready to use, non-toxic, biodegradable commercial strength solvent. Simply spray onto a dry oxidized surface, wait approximately one minute and then agitate with a soft brush. Follow with a rinse of cold water and watch the white oxidation rinse away!

*It's always suggested to first test an inconspicuous area before applying. Not recommended for use on Aluma-Lite substrates with non-primed, non-catalyzed paint.

WRAP WASH Keeps wraps looking great!

Wrap Wash is a super concentrated, high foaming and lubricating cleanser intended to clean wraps after installation and **produces a positive charge to repel dirt** and leave a clean mirror-like finish. It also works great to clean the surface of the vehicle when preparing for installation, as well!

Unlike most acidic products for washing vehicles, Wrap Wash is pH balanced which eliminates any Alkaline buildup that may occur. Just mix 2 ounces of Wrap Wash with a gallon of water, wipe it on with a soft brush, cloth or sponge and rinse off while it's still wet. 8oz bottles are great for putting together "Wrap Care" kits to be given to the end user.
