

Knifeless Tech Systems

Knifeless Technology Systems is the perfect solution to wrapping vehicles without using a blade.

Benefits

Trimming is one of the most important parts of a wrap, but with traditional methods it's done at the end of the job when installers may be tired and more prone to making mistakes.

- Using Knifeless Tape you can reposition the cut line. If you're using a knife, one bad cut can ruin a panel, forcing you to reprint, or take significant time to salvage the panel. This costs you time and money.
- Knifeless Tape is faster and easier than traditional trimming. On average it takes an installer one vehicle wrap to feel comfortable using the Knifeless Tape method. Most installers report using the Knifeless Tape method saves a significant amount of time.

Easy to Use

- **APPLY KNIFELESS TAPE**
To create a trimming line, apply the Knifeless Tape along the edge of the graphic where you want to trim the wrap. If you need to change the line, simply reposition the tape.
- **APPLY WRAP & PULL KNIFELESS TAPE**
Install your wrap in panels as you normally would. The Knifeless Tape is coated so it will not stick to the wrap vinyl. Pull the filament along the Knifeless Tape line and the wrap is cleanly and accurately cut.
- **REMOVE EXCESS WRAP**
Pull off the excess wrap, remove the Knifeless Tape and tuck the trimmed vinyl in around the edges. There's no need to remove the tail light or any other vehicle accessory. Knifeless Tape gives you a perfect cut every time!

Install wraps in much less time than traditional wrap methods!

Practically eliminates the possibility of cutting into a vehicle's paint and there's no need to remove vehicle parts.

Knifeless Tech Systems

There are 3 tapes - **Finish, Perf and Bridge** - that work together seamlessly to wrap your vehicles while completely eliminating the risk of potential scratches.

Knifeless Finish Line Tape

Finish Line Tape is perfect for wrapping cars, boats, and anything else that you apply vinyl to where you need that *perfect cut*. No more struggling to use a knife to cut a straight line or edge - just used Knifeless Finish Line Tape to do the cutting for you!

- 3.5mm (1/8" nominal) width
- Use for most wrap applications
- Conformable around bumpers, door handles, mirrors, etc.
- Available in 50 meter (164 feet) rolls

Knifeless Perf Line Tape

Perf Line Tape is designed to cut perforated window films without using a blade, allowing for a perfect 1/8" edge for the installation of the seal tape.

- 6.35mm (1/4") width
- Use with perforated window film for perfect easy cuts every time
- After trimmed leaves 1/8" gap to apply seal tape
- Great for vehicle wraps and window wraps
- Available in 50 meter (164 feet) rolls

Knifeless Bridge Line Tape

Bridge Line Tape is used to bridge the gap between doors where you often find rubber seals and also allows for extra material for wrap-around application.

- 12.7mm (1/2") width
- For use between wide gaps (ex. between doors, seams and rubber seals)
- Available in 50 meter (164 feet) rolls

DesignLine Tape **NEW!**

When only a knife cut is acceptable, use DesignLine tape from Knifeless Tech! DesignLine is guaranteed to work with 2 and 3 mil vinyls, carbon fiber vinyls, chrome and most textured vinyl. **some restrictions may apply*

- Allows stretching, follows contours and turns easily in any direction
- Excellent for creating designs and stripes with no extra steps required to achieve the perfect cut
- Available in 50 meter (164 feet) rolls
