

NAZDAR DIGITAL INKS

With the increasing competition in today's digital printing market, choosing the right ink – at the right cost – is critical to both the quality of your work and your profit. **Nazdar's Digital Inks** offer substantial savings over OEM inks and provide easy conversion on a variety of industry leading digital printers. Unattended printing is safe and reliable with the no-clog, fast-drying formula.

133 Series Ink for Mimaki JV33/CVJ30

Nazdar 133 Series inks are designed for the Mimaki JV33 and CVJ30 digital printers. Features include:

- No profiling necessary in most situations.
- High intensity, high gloss colors equivalent to the original SS21 OEM inkset.
- Long-term exterior performance with proven UV resistance.
- Reliable unattended printing.
- Excellent adhesion and flexibility on most media.

Available in 440 mL cartridges and 1-Liter containers.

1302 Series Ink for Mimaki JV3

Nazdar 1302 Series digital imaging inks are designed for use in the Mimaki JV3 digital printers and install just like your OEM inks. It's easy to convert from SS2 to Nazdar 1302 with no profiling necessary. Features include:

- Long-term exterior performance with proven resistance to the effects of UV degradation and color fading.
- High impact, high intensity colors equivalent to the original OEM inkset.
- Consistent color density values.
- Excellent adhesion and flexibility on most self-supporting flexible vinyls and pressure-sensitive vinyls.
- Fast drying characteristics that minimize your risk of "blocking."
- Reduced color management costs—color matched to SS2 inks so there's no need to color profile when replacing existing OEM product.

Available in 440 mL cartridges and 1-Liter containers.

Compatible Mimaki Printers

133 Series inks work in:

JV33 Series CJV30 Series

1302 Series inks work in:

JV3-75SPII JV3-130SPII
JV3-160S JV3-160SP
JV3-250SPF

NAZDAR DIGITAL INKS

2000 Series Ink for Roland Printers

Nazdar 2000 Series digital imaging inks are designed as a true, low-odor alternative to “eco” type ink sets. Primary features include:

- OEM color match to ECO-SOL Max® and Eco Ultra™—no need to profile when replacing these inks.
- Compatible with Eco™ and Eco+™ systems.
- Excellent exterior performance with proven resistance to the effects of UV degradation and color fading.
- High impact, high intensity colors equivalent to the original OEM ink set.
- Reduced odor and VOC content.
- Consistent color density values.
- Excellent adhesion and flexibility on most digital inkjet media.
- Enhanced drying characteristics minimize your risk of “blocking”.

Available in 440 mL cartridges and 1-Liter containers.

Compatible Roland Printers
