

## Sensient ElvaJet® Dye Sublimation Ink

### *The Difference You Can See*

#### **ElvaJet® Swift**

The latest generation of dye sublimation inks, the **ElvaJet® Swift series combines reliability, value, and performance, unmatched by any other ink on the market.** Swift series offers outstanding printability and performance on all printers equipped with Epson DX printheads, which means you can print longer hours at the highest quality while optimizing resources.

Featuring extremely high dye concentration, Swift series allows for an average ink coverage saving of up to 40%, significantly reducing stress on the transfer paper. Perfect for printing garments, interior textiles, sportswear, flags, and banners.

- Outstanding printability on virtually any printer equipped with Epson DX printheads
- Easy installation of inks
- Incomparable open time and immediate start after printing pause
- Fast drying and high transfer rate (on coated and uncoated paper)
- Superior color strength at much lower ink consumption

#### **ElvaJet® S4 Subli**

**ElvaJet® S4 Subli offers OEM performance at a value.** The versatility of light and secondary colors allows for higher flexibility and creative adaptability on your textiles of choice. Light colors were initially used to reach photographic quality before grey-scale printheads were made available (early heads had fixed drop size). Now, they are used in fine designs and on some hard substrate applications (3D, aluminum, glass, etc.)

- **Secondary colors available:** orange, blue, fluorescent yellow, fluorescent red
- **Light colors available:** light magenta, light cyan, light black

#### **ElvaJet® SE 100**

**ElvaJet® SE 100 offers higher productivity and performance than OEM inks.** The very high dye concentration allows for average ink coverage savings of up to 30%, which significantly reduces the stress on the transfer paper. No cockling arises even on the thinnest papers, and drying is very fast and requires less energy.

- No cockling
- Very fast drying
- Very high transfer rates
