

SmartWasher®

The SmartWasher® Bioremediating Parts Washing System is both self-cleaning and deregulated. This is a green parts washer that works on tough jobs. A free 30-day trial is available.

SmartWasher

- eco-friendly • free 30-day trial
- lower operating costs

The OzzyMat

Ozzy microbes, impregnated in the OzzyMat, are transported along with the OzzyJuice into the SmartWasher tank. Change the Ozzymat once per month to maintain clean Ozzyjuice.

Heated OzzyJuice

Flowing through the nozzle and flow-through brush onto the dirty part, then traveling through the OzzyMat and into the SmartWasher tank. OzzyJuice is a powerful, aqueous based degreasing solution that is pH-neutral, non-hazardous, non-flammable, and non-toxic. Armed with superior cleaning capability, the OzzyJuice solutions will match or surpass the performance of a premium solvent without all the associated costs and risks. All OzzyJuice solutions are certified by both NSF and AQMD.

The Ozzy Microbes

These natural occurring Ozzy® microbes eat the grease, oil, and other contaminants and create a harmless by-product of carbon dioxide and water. This bioremediation process leaves the OzzyJuice clean and strong and ready to use time after time without the need to change, evacuate or haul away dirty washing fluid.

The 300 GPH Recirculating Pump

Pulls the OzzyJuice from the tank and sends it back through the nozzle and brush - ready to clean more dirty squeegees, flood bars, or even screens!
